## REASONS FOR ALLOWANCE

1. This action is in response to the amendment and arguments filed on 8/13/2009.

### ***Allowable Subject Matter***

2. Claims 33, 36-44, 48, 51-59 and 63-64 are allowed over the prior art.

The following is a statement of reasons for the indication of allowable subject matter:

In the Examiner's opinion, the prior art of record either singularly or in proper combination fails to teach providing a user access to its home operator via an access network containing a plurality of supported visited networks, where at least one of the supported visited networks contains two agents, a first agent to forward requests to an identified operator and a second agent to handle authentication requests that have unknown realms. In order to provide the user access to its home operator, the user sends its user credentials that include a realm identification component to the access network, and the access network forwards the user credentials to an authentication function within the access network; the authentication function searches in a routing table for the realm identified in the user credentials, determines that the realm is not included in the routing table and simultaneously transmits to all supported visited networks the user credentials whose realm was not found; the supported visited networks determine the user's home operator and send the contact information for the user's home operator to the access network; the access network retrieves a list of roaming networks that hold a roaming agreement with the user's home operator and forwards the list to the user; the user selects a roaming network from the list and sends an identifier of the chosen roaming network to the authentication function, and the authentication function sends the user's authentication request to the roaming network identified by the user.

Ahmavaara et al (US Patent Publication No. 2004/0066756 A1), Tummala et al (US Patent No. 6,915,345 B1), Thomas (US Patent No. 6,421,339 B1) and Basilier et al

(US Patent No. 6,728,536 B1) in combination disclose providing a user access to its home operator via an access network containing a plurality of supported visited networks, where at least one of the supported visited networks contains two agents, a first agent to forward requests to an identified operator and a second agent to handle authentication requests that have unknown realms; the user sending its user credentials which include a realm identification component to the access network; the access network forwarding the user credentials to an authentication function within the access network; the authentication function searching in a routing table for the realm identified in the user credentials and determining that the realm is not included in the routing table; the supported visited networks determining the user's home operator and sending the contact information for the user's home operator to the access network; the access network retrieving a list of roaming networks that hold a roaming agreement with the user's home operator and forwarding the list to the user; the user selecting a roaming network from the list and sending an identifier of the chosen roaming network to the authentication function, and the authentication function sending the user's authentication request to the roaming network identified by the user.

However, the cited references fail to teach the claimed limitations of the authentication function simultaneously sending to all supported visiting networks the user credentials whose realm identification component is not found within the routing table. Therefore, the prior art of record either singularly or in combination fails to teach the above claimed limitations for claims 33, 48 and 64 and is therefore the reason for allowance. Claims 36-44 are dependent on claim 33 and claims 51-59 and dependent on claim 48; therefore, the dependent claims are allowed under the same reasons set forth above.

### ***Conclusion***

3. The prior art not relied upon but considered pertinent to applicant's disclosure is made of record and listed on form PTO-892.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
